Experiment 5: Localization-Based Mobile Application

Aim: To design a wireframe for a mobile application incorporating localization features using Figma.

Procedure:

1. Open Figma and create a new design file.
2. Select a smartphone frame for the application.
3. Design a home screen with a location search bar.
4. Add a map showing the user's current location.
5. Include nearby places, route navigation, and location details.
6. Add location permission and settings options.
7. Use Prototype mode to connect the screens and test navigation.

Output:
